INVITATION

“Digitalization - potential for education, counselling and knowledge transfer”

University College for Agrarian and Environmental Pedagogy

4th November 2019

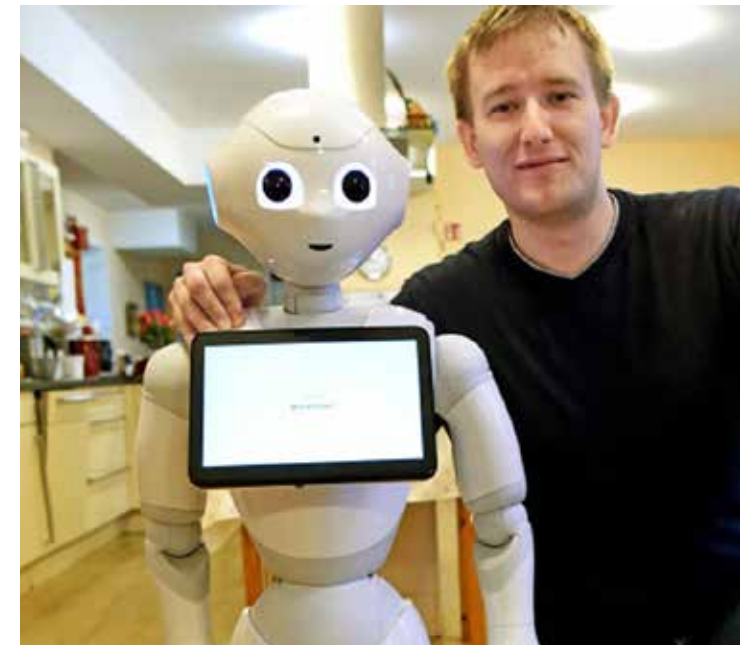

photo credits: m.W. / FH Kiel, Emma with Hannes Eilers

International Conference - Cooperation among the University College for Agrarian and Environmental Pedagogy, the International Academy for Rural Counselling (IALB) and the Austrian Chamber of Agriculture

Digitalization is not an end in itself, even in consulting. Direct potential lies in regional and global accessibility, communication across borders, time savings and the elimination of travel expenses. What is the additional benefit of digitalization compared to previous analogue methods and possible combinations of the best of both worlds - digital and analogue?

Digital transformation in agriculture continues to change the job profile of a farmer as well as the professional field of a consultant. Get to know specific methods for digital counselling and knowledge transfer.

Program

08:30 a.m. **Registration** (entrance to the new auditorium center)

09:00 a.m. **Welcome speech and thematic introduction**

DIⁱⁿ Elisabeth Hainfellner
