

TEASPILS: Teaching Environmental Awareness with Smart IoT Planters in Learning Spaces

Newsletter III: August 2022

Project Number: 2020-1-ES01-KA203-082258

3rd Transnational Project Meeting

The 3rd transnational project meeting for the TEASPILS project was successfully hosted by PHW in Vienna, Austria on the 30th and 31st of May. The meeting proved to be highly productive as we diligently prepared the upcoming training activity. Additionally, during the meeting, we unveiled and explored the IoT ecosystem, which holds immense potential for enhancing our project's reach and impact.

The enthusiasm and dedication displayed by all participants ensured a fruitful discussion and set the stage for further advancements in our shared mission.

Teacher Training Event

The teacher training event was held from 1st to 3rd of June, hosted by PHW, in Vienna, Austria. The training event brought together educators and trainers from partner countries, creating a collaborative atmosphere where they could network, exchange ideas, and share best practices. Throughout the event, participants were immersed in a comprehensive training program that encompassed the entire TEASPILS ecosystem. Expert trainers guided attendees through the intricacies of developing effective learning plans, cultivating green competences, and leveraging the power of the IoT system.

TEASPILS Project Pilot Phase coming soon!

Teachers and trainers are now ready to start piloting the TEASPILS project at schools and lay a strong foundation for a future where sustainability education takes center stage, shaping the leaders and changemakers of tomorrow! Stay tuned!
